SUMMARY

As an AI Engineering Student at Esprit School of Engineering, I am passionate about technology, problem-solving, and continuous learning. My academic journey has equipped me with strong analytical and technical skills, allowing me to adapt to various challenges and work on innovative projects. I enjoy collaborating with others, sharing knowledge, and exploring new technologies. Driven by curiosity and adaptability, I am always seeking opportunities to grow and contribute to impactful solutions.

EDUCATION

Engineering Student Specialized in Artificial Intelligence - Esprit	2024 - Present
Integrated Preparatory Program - Esprit	2022 - 2024
Mathematics Baccalaureate - Megrine	2022

INTERSHIPS EXPERIENCE

Orange Tunisie Charguia	July 2023 - August 2023
- Assisted in developing and testing network architectures, verifying and assessing integrated radio sites at Orange Tunisie. - Gained knowledge of supervision and maintenance tools, and collaborated with the IT team to resolve technical issues and contribute to project planning	

ACADEMIC PROJECTS

AI-Powered Healthcare Solutions Website	January 2025 - Present
Project Overview: Developed a web platform featuring several AI-driven tools aimed at optimizing pharmaceutical operations and improving patient care. The website includes AI-powered medication stock prediction, prescription reading, and an intelligent assistant for pharmacists, along with a skin imperfection detection system. My Role: Focused on the Skin Imperfections Detection feature, where I implemented a YOLOv8-based model for accurately detecting issues like acne, blackheads, and other skin conditions. Additionally, I contributed to the development of a personalized skincare recommendation system, integrating it with real-world data from a pharmacy to enhance the system's effectiveness. Technologies Used: YOLOv8, pre-trained models, Retrieval-Augmented Generation (RAG), and Agentic AI.	

Website Project using Django Framework - PetCare	October 2024 - December 2024
- Created a pet care and adoption platform using Django, integrating AI functionalities. - Collaborated with a team of 5, using Scrum methodology and Jira for project management	

Website Project using HTML, CSS and PHP - Azultunes	March 2024 - June 2024
- Developed a travel and tourism platform promoting responsible tourism in Tunisia, integrating AI for personalized trip planning. Designed interactive forums, a recommendation system, and a reservations module. - Selected among the top 10 university projects.	

Desktop Application Project using C++ and QT - GemTrack Pro **October 2023 - December 2023**

- Contributed to developing the GemTrack Pro desktop application using C++, Qt, and Oracle. Led UI/UX design and developed the jewelry management module.

Game Project using C Language - The Last Hope **March 2023 - June 2023**

- Developed a game in C using SDL, collaborating on design and implementation as part of a team.

CERTIFICATIONS

Fundamentals of Deep Learning - NVIDIA  **December 2024**

Generative AI with Diffusion Models - NVIDIA  **February 2025**

AWARDS

TuniHack 10.0 Hackathon 2nd Place  **January 2025**

Astronomica 4.0 Ideathon 2nd Place  **November 2024**

Selected as one of the top 10 projects for the 'Bal des Projets' event.  **June 2024**

ADDITIONAL INFORMATION

- Soft skills: Communication, Teamwork, Presentation Skills, Attention to Detail, Creativity.
- Machine Learning : Deep Learning, CNN, TensorFlow, Keras, YOLO.
- Frameworks: Django, ExpressJS, Symfony.
- Graphic Design: Adobe Photoshop, Adobe Illustrator, Canva
- UI/UX Design: Figma
